

Recruitment Services

Global Integrity

As an established leader with a global footprint, Sitec provide recruitment & staffing solutions to clients throughout the world. With a wealth of Engineering expertise, Sitec work in partnership with its clients to offer matched solutions using an array of business models that include: -

- Approved/Strategic Supplier
- Managed Agency Supply
- Master Vendor Agreements
- Preferred Supplier Solutions

By combining unique sector by sector expertise, innovative use of technology and proven recruitment strategies Sitec separates its self from its competitors to lead the way in this competitive and challenging market.

Global Resource

Expertise in the Engineering world coupled with experienced recruitment managers and their teams, enable Sitec to provide the right candidates with the right skills. Matching client's requirements and meeting client's needs, whilst providing the professionalism and level of communication you would expect from a global player. Sitec supply Engineers from all Engineering sectors, many of them from across Europe, India and the Americas enabling it to meet the language requirements needed in today's multi lingual engineering environment.

Global Knowledge

Access to candidates throughout the world, unequalled knowledge, support, and core in-house skills; Sitec provide tailor made solutions to cover a diverse range of roles. From project managers, designers and manufacturing engineers to production operators and administrative staff.

Global experience provides the unique knowledge that comes from working in a diverse range of countries each with varying employment law, tax and social security requirements. With country by country expertise Sitec provide solutions throughout the UK, Europe, America, Asia and the far-east, on both a temporary and permanent basis.

Sitec supply the solutions you need, either directly or in partnership with selected second-tier organisations.
